Signal Deep Dive — Portfolio Holdings

Radar charts decompose each position into its five EARKE signal dimensions. All axes: 0 (worst) → 1 (best). Anti-Crowding = 1 – X_C.

This Week's Actions

Positions to Exit

Ticker	Crowding	Quality	Composite	Reason(s)
NVDA	0.770	0.920	0.340	Crowding >= 0.75

New Entry Candidates

Ticker	Composite	Quality	Crowding	mu est.	Kelly 25%
DNN	0.480	0.440	0.220	13.0%	4.0%
PRIM	0.420	0.620	0.300	9.0%	3.5%

Watch List — Crowding Elevated

Ticker	Crowding	Exit Threshold	Quality	Composite
MP	0.620	0.75	0.480	0.520

Rebalances

Ticker	Old Weight	New Weight	Action
NEE	5.0%	6.5%	increase
CCJ	6.5%	5.8%	decrease

Universe Scanner — Top 15 Candidates

Ranked by composite score (X_E × X_P × (1–X_C)). Entry = YES requires composite ≥ 0.30 and crowding ≤ 0.40.

#	Ticker	Composite	Physical	Quality	Crowding	mu est.	Kelly 25%	Entry
1	ENR.DE	0.710	0.820	0.740	0.280	12.0%	7.6%	YES
2	MSFT	0.680	0.610	0.880	0.350	10.0%	7.2%	YES
3	NEE	0.630	0.790	0.660	0.310	9.0%	6.5%	YES
4	CCJ	0.590	0.900	0.550	0.440	11.0%	5.8%	YES
5	RHEINM.DE	0.570	0.650	0.720	0.380	10.0%	5.5%	YES
6	AWK	0.540	0.710	0.690	0.290	8.0%	5.0%	—
7	MP	0.520	0.850	0.480	0.620	14.0%	4.8%	—
8	DNN	0.480	0.920	0.440	0.220	13.0%	4.0%	YES
9	PRIM	0.420	0.600	0.620	0.300	9.0%	3.5%	YES

FX & Capital Flows

FX Pair Returns

Pair	1M Return	3M Return	12M Return
EURUSD=X	+2.20%	+4.10%	+6.80%
GBPUSD=X	+0.80%	+1.50%	+3.20%
USDCHF=X	-1.50%	-2.80%	-5.20%
USDCAD=X	-1.00%	-1.80%	-2.50%
USDJPY=X	+0.50%	+1.20%	-3.10%

Sector Flow Heatmap

Country Capital Flows (EUR-adjusted)

Region	Index	4W EUR	13W EUR	Flow Direction
US	SPY	+0.90%	+2.50%	inflow
EU	EXW1.DE	+5.50%	+11.20%	strong inflow

Portfolio Implications

- EUR strengthening supports EU holdings
- Nuclear sector showing strongest momentum
- USD weakening reduces USD-denominated exposure

Macro Context & Risk Parameters

Risk-Free Rates

Region	10Y Risk-Free Rate
US	4.25%
EU	2.78%

Kelly & Constraint Parameters

Parameter	Value	Description
Kelly fraction	25%	Fractional Kelly multiplier (epistemic discount)
Max position	8%	Per-stock cap — Goodhart immunity
Max bucket	35%	Megatrend concentration cap
Min position	2%	Below this → position dropped
Cash reserve	10%	Minimum liquidity buffer
Entry threshold	0.30	Composite score required for entry
Crowding entry max	0.40	Maximum X_C at entry (crowding gate)
Crowding exit	0.75	X_C ≥ this → mandatory exit
Quality exit	0.25	X_P ≤ this → mandatory exit
Impact scaling c	1.0	Universal Square-Root Law constant (Bouchaud)

EARKE Module Implementation Status

Module	Spec Component	Status
I — Kausales Gedächtnis	CD-NKBF · bitemporale t_e/t_k · Ghost States	PARTIAL
II — Deterministischer Anker	X_E · X_P · X_C · μ_base (Eq. 4–7)	COMPLETE
III — Hybrider Motor	UDE · Deep Ensembles · σ^2_epist (Eq. 8–9)	DEFERRED
IV — Kontrafaktisches Labor	PI-SBDM · Lévy diffusion · minimax λ* (Eq. 10)	DEFERRED
V — Hard-Capacity Kelly	Full Eq. 12 · Not-Aus · AUM-Asymptote	PARTIAL
